

## How to send WORDCOIN to your wallet? (for those, who contributed via MetaMask or Mist)

1. Log into your wallet;
2. Follow the link – <https://wallet.ethereum.org/contracts>
3. Choose "Watch the contract";
4. Insert the following information in the appeared window:
  - Contract address           0x5fcdff4e204fa102a961f907fb51d549fbfd7953
  - Contract name             PRE ICO WORCOIN
  - JSON interface           [https://wordcoin.io/json\\_interface\\_preico.txt](https://wordcoin.io/json_interface_preico.txt)

5. Then choose the added contract;
6. On the right there'll be the list, where you should choose "Send Token" item, and then to press "Complete" button.
  - 6.1. For investors, who contributed more than 7 ETH, it's necessary to choose "Get Large Bonus" option and to press "Complete" button.
7. Transaction confirmation will appear in the pop-up window. Choose "Submit" option and wait till the transfer is completed.
8. Then it's necessary to enter MetaMask, proceed to "Tokens" tab, press "Add Tokens" and insert the fields:
  - Token Contract Address      0x5fcdff4e204fa102a961f907fb51d549fbfd7953
  - Token Symbol                      WORD
  - Decimals of Precision              8

The screenshot shows the MetaMask mobile interface for adding a new token. At the top, it displays the MetaMask logo, 'Main Network', and 'METAMASK'. Below this is a back arrow and the title 'ADD TOKEN'. The form contains three input fields: 'Token Contract Address' (0x5fcdff4e204fa102a961f907fb51d549fbfd7953), 'Token Symbol' (WORD), and 'Decimals of Precision' (8). An orange 'Add' button is located at the bottom of the form.

9. After that WORD tokens will appear in your wallet.
